

## User's manual

We are glad that you are just as excited about the Wobbel as we are. To make sure you and your family can enjoy the Wobbel a lot and for a long time we urge you to read this manual. The Wobbel is a product of natural materials. Please check the Wobbel on arrival for the curve, looks, damages and stability. Please contact us within 14 days if you have any comments.

### *Age and weight*

The standard Wobbel and felt finished version are designed and CE certified for children of 0 months and older, but is also suitable for older children and adults up to 200 kilograms. The Wobbel with the cork finish is CE certified for children of 3 years and older. The Wobbel is a balance board to be used standing on it. Other uses have not been tested and certified, so Wobbel B.V. cannot guarantee it's safe usage when used in other ways. Never let them stand or sit on the sides.

### *Use and safety*

The Wobbel is a very mobile toy and, as always with these kinds of toys, parental or adult supervision is required. Especially for children of younger ages. A few guides for using the Wobbel:

1. Make sure your child always uses the Wobbel under adult supervision;
2. Let your children get used to the Wobbel slowly and help them by giving them a hand or two. Make clear appointments about what can and can't be done with it;
3. Never wear socks or smooth shoes. Bare feet or shoes that aren't slippery prevent accidents;
4. Take care with fingers at the edges. Teach your children from the first use to always keep their fingers away of the edges;
5. Make sure there is at least 2 meters of free space around the Wobbel (including other children). Place the Wobbel on a level surface;
6. The Wobbel is designed for indoor use. It can be used outdoors, but will wear quicker. Never leave outside, because water and moist will eventually damage the wood, paint, felt and or cork;
7. Cork and felt are natural materials and are due to wear and tear. Make sure your children don't put pieces in their mouths. The untreated EKO felt can go pilling. This has no effect on the use. Optionally, you can remove the pilling with a lint clipper or by hand;
8. If no cork of felt is underneath the Wobbel we recommend that you use a mat, carpet or rug underneath the Wobbel. This protects the Wobbel, your flooring and your ears. For vulnerable or floors that aren't scratch resistant we always recommend using a mat, carpet or rug underneath the Wobbel, even if there is cork or felt underneath. Unprotected parts can still damage your floor or the Wobbel could get damaged.
9. The Wobbel can get damaged by the use on hard and or irregular floors. Especially pay attention with tile flooring. Cork and felt can protect when using it with the convex side up (u). If no cork of felt is on your Wobbel we recommend that you use a mat, carpet or rug underneath it to protect the Wobbel, your floor and your ears. With the concave side up (n) cork or felt don't offer protection and we recommend using a mat, carpet or rug underneath it. Moving or dragging the Wobbel over these kind of floors with the concave side up (n) the edges could get damaged.
10. Users that are or were under the care of a physical therapist for their musculoskeletal system are advised to contact that therapist for proper use of the Wobbel.

## User's manual

### *Cleaning and maintenance*

It is advised to clean the Wobbel with a damp cloth, combined with a mild detergent if necessary. It's important to wipe it with a dry cloth after cleaning. Cork and felt are best cleaned in the same way. We had great results with a natural soap. Don't wet the cork and felt too much because that could result in the detachment of the glue or could deform the cork. Don't brush the felt too much, because that might damage it.

The Wobbel doesn't need any special maintenance.

### *Technical information*

The Wobbel is made from sustainably harvested European beech wood (FSC) which is pressed and finished with water based lacquers and stains. Both felt and cork are natural products as well.

The Wobbel is CE certified according DIRECTIVE 2009/48/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 June 2009 on the safety of toys. It was also voluntarily tested until breaking point. These tests guarantee a safe weight limit of 200 kilograms.

Enjoy the Wobbel!
